

AXXELA Interview Experience - Campus Recruitment at D J Sanghvi College - Bhagya Shah (2023-24 Batch)

Round 1 - (6th July 2023 - Virtual):

The first round of the placement process took place virtually. The round consisted of a quick math test focusing on BODMAS equations. Following a pre-placement talk, the participants were provided with a link to access the test, which was conducted on the Mettl platform. The test consisted of two sections. The first section consisted of 10 math questions, with each question having 5 sub-questions involving basic operations such as addition, subtraction, and multiplication. The second section consisted of general questions related to the stock market and family background.

Round 2 - (7th July 2023 - At Campus):

Approximately 100 candidates were shortlisted for the second round, which took place on the 7th of July 2023 at the campus. This round also included a math test similar to the one in the first round, along with aptitude questions. The aptitude questions covered various topics such as Arithmetic Aptitude, Data Interpretation, Verbal Ability, Logical Reasoning, and Verbal Reasoning. The test duration was around 30 minutes, with 5 minutes dedicated to the math test and 25 minutes allocated for the aptitude section consisting of 25 questions.

Round 3 - (7th July 2023 - At Campus):

30 students were shortlisted for the third round, which was a gaming round. In this round, the participants were divided into groups of 10. The game involved a basic concept of buying and selling stocks among the group members while guessing the stock prices. The rules of the game were explained before the

commencement of the round. The basic strategy should be of buying at low prices and selling at high prices and follow the rules explained.

Round 4 - (8th July, 2023 - At Office):

In the final round of the placement process, only 10 students were shortlisted. This round consisted of one-on-one interactions with the recruiter. The recruiter asked a series of quick math questions that required mental calculations, such as multiplying numbers like 78 and 79, finding the square root of 0.9, and calculating the cube of a certain number. Additionally, the recruiter posed puzzles from platforms like GeeksforGeeks (GFG), including a scenario with two trains and a bee moving, with a question regarding the total distance covered.

The recruiter also inquired about the candidates' knowledge of the market and asked questions about their interests in the market, their choice of trading, and their reasons for selecting that particular job role. They asked about past experiences related to the market, including stock market knowledge, and posed questions about topics like repo rates, inflation, and the Reserve Bank of India (RBI). Furthermore, they inquired about the candidate's knowledge and understanding of Axxela, and the reasons for their interest in the company.

After two days, the results were announced, and unfortunately, **No one was selected for a position at Axxela this year.**
