

Edelweiss Analyst Interview Experience - Ankit Ladva

25/07/23 Test :

- Test was based on aptitude and statistics, probability questions along with 1 coding question.(level medium to hard)
- There were 26 total questions, 20 were aptitude and math related, 5 MCQ questions

12 out of 120+ were selected for next round

Round 1(45 min):

- Introduce yourself (technical experience along with any trading experience if any). Spoke about internship projects and trading related knowledge.
- Was asked about which strategy I used in trading and how profitable it was for me.
- A question on wire having some ants running on it with velocity v and in any direction . The length of wire was L , so how much time will it take for the wire to be clear of all the ants?
- A game question of bidding where there a host gives 100 rupees to the winner based on the bids by the participants. Suppose two people are playing the game and start the bidding from 5,6,7 and further , so till how much should you continue bidding? (I said I will take a risk to reward ratio of 1:2 so i won't continue bidding after 50).
- A game of three players where I am one player and my probability of winning against one player is 0.6 and the probability of winning against the other player is 0.4. So which player should I play first in order to win two consecutive games?(condition : If I play the first game with A then the second game should be played with B).

2 out of 12 were selected for next round

Round 2:

- Advanced probability Questions

Results:

No one was selected for the analyst role.

Pro Tips:

- Be confident and show you are very interested for the role .
- Study probability and related advanced questions on it.
